

Intrepid Income Fund

Discipline Makes the Difference.

June 30, 2010

ticker: ICMYX

Investment Objective

The Intrepid Income Fund seeks high current income and capital appreciation.

Principal Investment Strategy

The Fund invests primarily (up to 100% of its net assets) in high yield securities.

PERFORMANCE

Average Annualized Total Returns as of June 30, 2010

	Inception Date	3 Month	YTD	1 Year	Since Inception
Intrepid Income Fund	07/02/07	0.16%	2.21%	11.29%	4.33%
B of A Merrill Lynch High Yield Master II Index		-0.07%	4.74%	27.53%	6.42%

Performance data quoted represents past performance and does not guarantee future results. Investment returns and principal value will fluctuate, and when sold, may be worth more or less than their original cost. Performance current to the most recent month-end may be lower or higher than the performance quoted and can be obtained by calling 866-996-FUND. The Fund imposes a 2% redemption fee on shares held less than 30 days. Performance data does not reflect the redemption fee. If it had, returns would be reduced.

Investment performance reflects fee waivers, in the absence of such waivers, total return would be reduced.

Growth of \$10,000 Investment

The chart illustrates the performance of a hypothetical \$10,000 investment made in the Fund since the Fund's inception. Assumes reinvestment of dividends and capital gains, but does not reflect the effect redemption fees.

Asset Allocation (% of the portfolio)

Common Stocks	1.1%
Other Short Term Investments	2.4%
Convertible Bonds	7.0%
U.S. Treasury Obligations	17.9%
Corporate Bonds	71.6%

Fund asset allocation is subject to change and is not a recommendation to buy or sell any security.

Per the Prospectus, the Fund's annual operating expense (gross) for Investor Shares is 1.48%. The Fund's Adviser has contractually agreed to waive a portion of its fees and/or reimburse expenses such that total operating expenses (excluding Acquired Fund Fees and Expenses) do not exceed 1.25% through 1/31/11. Otherwise, performance shown would have been lower.

Investments in debt securities typically decrease in value when interest rates rise. The risk is generally greater for longer term debt securities. Investments by the Fund in lower-rated and non-rated securities presents a greater risk of loss to principal and interest than higher rated securities. The fund is non-diversified, meaning it may concentrate its assets in fewer individual holdings than a diversified fund. Therefore, the fund is more exposed to individual securities volatility than a diversified fund

Average Maturity: The average of the stated maturity dates of the fixed-income securities held in the fund.

Effective Duration: Duration is a time measure of interest-rate risk exposure that estimates how much a bond, or a bond fund's price, fluctuates with changes in interest rates.

Turnover Ratio: The Turnover Ratio indicates the percentage of the mutual fund's portfolio holdings that are bought and sold in a given year.

PORTFOLIO

Bond Characteristics

Average Maturity	3.33 yrs
Effective Duration	2.59 yrs
30 Day Subsidized SEC Yield	5.01%
30 Day Unsubsidized SEC Yield	4.92%

The above information represents averages for the fund's holdings. They will vary over time.

INVESTMENT DISCIPLINE

Independence.

We do not follow the herd on Wall Street because:

- ◆ We focus on a business's value, not its changing bond price.
- ◆ We buy only good businesses at good prices, using detailed fundamental analysis.
- ◆ We do not chase performance by buying into "hot" sectors or broad market trends.

We typically are not correlated to benchmark indices because:

- ◆ We have a concentrated portfolio consisting of our best ideas.
- ◆ We do not attempt to match our sector weightings to benchmarks.
- ◆ We are flexible and do not have a fully invested (no cash) mandate.

Integrity.

- ◆ We produce valuations using realistic assumptions.
- ◆ We generate our research internally and avoid external sell-side analysis.
- ◆ We invest our own money alongside our clients' funds.
- ◆ We will not buy a bond for the fund that we would not buy for ourselves.

The Intrepid Income Fund primarily invests (up to 100% of its net assets) in high yield securities. High yield securities typically pay high current interest. They also offer the potential for capital appreciation when purchased at a discount to par value or when favorable company-specific events occur or changes in interest rates increase the price in the short-term. The Intrepid Income Fund's investments in high yield securities will not be limited in duration, but typically will be in securities having a duration of two to six years at the time of purchase. Duration is a measure of a debt security's price sensitivity taking in to account a debt security's cash flows over time. For example, a security with a duration of five would likely drop five percent in value if interest rates rose one percentage point. Also the Intrepid Income Fund's investments in high yield securities will not be limited in credit rating, but typically will be in securities rated below investment grade by a nationally recognized statistical rating agency. The Intrepid Income Fund believes that these securities may be attractively priced relative to their risk because many institutional investors do not purchase less than investment grade debt securities. When the spread between the interest rates earned on high yield securities and the interest rates earned on investment grade debt securities narrows, the Income Fund may invest in investment grade debt securities and money market instruments. The investment grade debt securities in which the Income Fund invests typically will have a duration of two to six years.

The B of A Merrill Lynch High Yield Master II Index is an unmanaged portfolio constructed to mirror the public high yield debt market. This index includes US dollar publicly issued corporate bonds and includes PIKS (payment-in-kind notes) and deferred interest bonds that are not yet accruing a coupon. Bonds rated in default, or that are not rated are excluded from the index. You cannot invest directly in an index.

Automatic Investment Plans do not assure a profit and do not protect against a loss in declining markets. The Intrepid Capital Funds are distributed by Quasar Distributors, LLC.
