Vice President
Portfolio Manager
Joined Intrepid Capital in 2000

INVESTMENT OBJECTIVE AND PRINCIPAL INVESTMENT STRATEGY

The Intrepid Disciplined Value Fund's primary objective is long-term capital appreciation. The Fund seeks to achieve this objective by investing in equity securities of any size capitalization companies. Equity securities in which the Fund may invest include common stocks, preferred stocks, convertible preferred stocks, warrants and foreign securities, which include American Depository Receipts ("ADRs").

PHILOSOPHY

We are valuation-driven investors. The Disciplined Value team focuses on businesses that are selling below what we believe the underlying businesses are worth. We focus on established businesses that have strong balance sheets and that generate consistent free cash flows. We attempt to reduce risk through detailed fundamental analysis, limiting the number of holdings, and by avoiding businesses that cannot be valued with a high degree of confidence. We employ a long-term investment approach focused on absolute results rather than relative results. By doing so, we attempt to think independently and avoid investment fads. We sell stocks when they exceed our calculated intrinsic value or when there is a decline in fundamentals. As bottom up investors, we focus on security selection, in which the decision to buy or sell a particular security is made independently of the presence or absence of investable opportunities among other securities. Therefore, in certain market conditions in which we are unable to find attractive discounts, we may determine that it is appropriate for the Fund to hold a significant cash position for an extended period of time. The Fund expects that it may maintain substantial cash positions when we determine that such cash holdings, given the risks we believe to be present in the market, are more beneficial to shareholders than investment in additional equity securities.

INVESTMENT DISCIPLINE

Independence.

- ◆ We focus on a business's value, not its changing stock price.
- ◆ We seek to buy only good businesses at good prices, determined by detailed fundamental analysis.
- ◆ We do not chase performance by buying into "hot" sectors or broad market trends.
- ◆ We have a concentrated portfolio consisting of our best ideas.
- ◆ We do not attempt to match our sector weightings to benchmarks.
- ◆ We are flexible and do not have a fully invested (no cash) mandate.

Integrity.

- ◆ We produce valuations using realistic assumptions.
- ◆ We generate our research internally.
- ◆ We invest our own money alongside our clients' funds.
- ◆ We will not consider a stock for the fund that we would not consider owning ourselves.

PERFORMANCE

	Total Return			Average Annualized Total Returns as of December 31, 2016		
	Qtr.	YTD	1 Year	3 Year	5 Year	Since Inception
Intrepid Disciplined Value Fund - Inv.	1.89%	12.02%	12.02%	5.15%	8.77%	5.83%
S&P 500 Index	3.82%	11.96%	11.96%	8.87%	14.66%	6.40%
Russell 3000 Index	4.21%	12.74%	12.74%	8.43%	14.67%	6.55%

ANNUAL PERFORMANCE

	2016	2015	2014	2013	2012	2011	2010	2009	2008
Intrepid Disciplined Value Fund - Inv.	12.02%	-3.70%	7.77%	18.53%	10.51%	-0.58%	16.75%	31.90%	-23.84%

Russell 3000 Index	12.74%	0.48%	12.56%	33.55%	16.42%	1.03%	16.93%	28.34%	-37.31%

Performance data quoted represents past performance and does not guarantee future results. *Investment returns and principal value will fluctuate, and when sold, may be worth more or less than their original cost. Performance current to the most recent month-end may be lower or higher than the performance quoted and can be obtained by calling 866-996-FUND. The Fund imposes a 2% redemption fee on shares held for 30 days or less. Performance data does not reflect the redemption fee. If it had, returns would be reduced.*

Per the Prospectus, the Fund's annual operating expense (gross) for the Investor Shares is 1.31%. The Fund's Advisor has contractually agreed to waive a portion of its fees and/or reimburse expenses such that the total operating expense (net) is 1.30% through 1/31/17. Otherwise, performance shown would have been lower.

GROWTH OF \$10,000 INVESTMENT

The chart illustrates the performance of a hypothetical \$10,000 investment made in the Fund since the Fund's inception. Assumes reinvestment of dividends and capital gains, but does not reflect the redemption fees.

Past performance is no guarantee of future results.

The Fund's investment objectives, risks charges and expenses must be considered carefully before investing. The statutory and summary prospectuses contains this and other important information about the investment company, and it may be obtained by calling 866-996-FUND. Read it carefully before investing.

The Fund is subject to special risks including volatility due to investments in smaller companies, which involve additional risks such as limited liquidity and greater volatility. The Fund is considered non-diversified as a result of limiting its holdings to a relatively small number of positions and may be more exposed to individual stock volatility than a diversified fund. The Fund may invest in foreign securities which involve greater volatility and political, economic and currency risks and differences in accounting methods.

Prior to April 1, 2013, the Fund's name was the Intrepid All Cap Fund.

The S&P 500 Index is a widely recognized unmanaged index of stock prices. The Russell 3000 Index measures the performance of the largest 3,000 US companies representing approximately 98% of the investable US equity market. You cannot invest directly in an index.

The information contained herein: (1) is proprietary to Morningstar; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information.

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating™ for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating™ metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. The Intrepid Disciplined Value Fund was rated 3-Stars and 1-Star against the following numbers of Mid-Cap Value funds over the following time periods: 337 and 301 funds in the last three- and five-years, respectively.

The Price to Earnings (P/E) Ratio is calculated by dividing current price of the stock by the company's trailing 12 months' earnings per share. The Price to Book (P/B) Ratio compares a stock's market value to the value of total assets less total liabilities. Standard Deviation is a statistical measure of portfolio risk used to measure variability of total return around an average, over a specified period of time. The greater the standard deviation over the period, the wider the variability or range of returns and hence, the greater the fund's volatility. Beta is a measure of volatility of systematic risk, of a security or a portfolio in comparison to the market as a whole. Free Cash Flow measures the cash generating capability of a company by subtracting capital expenditures from cash flow from operations. Median Market Cap is the midpoint of market capitalization (market price multiplied by the number of shared outstanding) of the stocks in a portfolio.

The Intrepid Capital Funds are distributed by Quasar Distributors, LLC.
